**FUN FLY**

Show your skill in piloting a 2-33 or 1-26 around the Inner Course, completing the most turn points in an hour. Partner with your favorite bombardier and drop your flour bomb closest to the target, then finish your run with a "Spot Landing". Try as many times as you want during the weekend. [Steve Statkus](#) will provide contest rules. He will also have burgers and dogs on the grill for fliers and families. Awards for each event could include a free Blanik flight.

**FIRST ANNUAL HORS D'OEUVRES AND WINE SHARING PARTY: SUNDAY, 8/31**

Please join us for conversation and fun on the patio this Sunday around 5 PM, rain or shine. Just bring an hors d'oeuvre to share and a bottle of wine if you wish. Don't forget a glass. No need to worry about grilling! Just relax! Contact [JoAnne Pedersen](#) for more information.

**CANOE FLOAT: SATURDAY, AUG 30, 2014 9:00 A.M.**

It is still possible to join the fun if you email [Gary Adams](#) promptly. So far, 15 people have signed up to canoe. The price is \$25 per canoe. Meet at 9:00 A.M. at Morgan's Ft. Ancient Canoe Livery, 5701 State Route 350 in Oregonia, OH. See page 6 for map and travel information.

## **BEEF AND CORN DINNER: SATURDAY, AUG 30, 2014 6:30 P.M.**

Last minute reservations available until Friday evening, August 29. The price is \$15 per person. The menu includes City Barbeque beef brisket and sweet corn on the cob with sides... Twenty five (25) have already made their reservations. To join the fun email [Gary Adams](#) and let him know how many will accompany you.

## **A SOARING PILOT'S HANDBOOK**

Dick Eckels' ***A Soaring Pilot's Handbook*** is now available from [Sporty's Pilot Shop](#) as an ebook. Printed copies should be available soon.

Prior to publication of this book students preparing for glider pilot certification have needed a whole library to cover all the topics on the Practical Test Standard. About five years ago Dick decided to write this book to provide a single source for all the information needed to address certification requirements of the Practical Test Standards.

Information is included that should be of interest to all soaring pilots, not just private and commercial pilot candidates. A number topics are addressed that are not directly available anywhere else in the soaring literature, including:

- A direct method of determining ACTUAL takeoff performance resulting from less than standard pressure altitude and higher than standard temperature, better known as high density altitude. Degradation of climb performance is included as well as a means of normalizing existing information to "standard day".
- Use of the Skew-T/log-P chart.
- IACRA registration and applications.

## **SUNDAY, AUGUST 24**

Steve Statkus and the Mighty 4<sup>th</sup> Sunday Crew launched 14 flights in the bright sunlight. However, the high temperatures, humidity and weak thermals made it a challenge.

## **CUB SCOUT PACK 57**

In keeping with tradition, Cub Scout Pack 57 from Lebanon held a camp out at CCSC August 22-24.

## **ASK ORVILLE: "WHAT WOULD YOU DO?"**

Hey Wilber,

I was hanging out at that Gliderport in Waynesville, and you are not going to believe what I saw. Some stranger had wandered onto the field and was walking to the flight line. He had a dog without a leash and the dog must have seen something because the dog took off and ran onto the field. Just as one of those tow-planes and a big white glider was taking off. You are not going to believe what happened next!

The tow pilot was paying attention and cut the power, but the glider was not so lucky. The nose wheel ran over the rope and the rope wrapped around the axle. The tow plane could not get out of the way, so he released the rope to let the glider maneuver past.

About an hour later after taking the wheel off and untangling the rope from the axle, the glider was ready to fly again. The pilot was happy because the weather had improved and he was able to stay up longer. One guy told me that at the club they take owners that have dog's without a leash and hang them in the barn by their big toes and flog them with a tow rope, until they promise to put their dog on a leash. I am so glad we did not have to deal with this in our days. But I wonder what you would have done in that situation?

Dear Interested Observer,

Dogs and airports are an accident waiting to happen. The only thing that can be done in these situations is to be vigilant and try to intercept the dog and owner BEFORE they get to the flight line. If a dog owner wanders onto an airport without his dog on a leash he is unaware of the consequences and needs to be made aware of the accident potential. It's ultimately the crew chief's responsibility but all crew members need to step up in situations when an accident can be prevented.

## **VIDEO CREATED DURING YOUTH CAMP**

At Youth Camp this year Kevin Wolf, Brian Stoops and many others joined forces to create a video. Kevin has finished the editing and it is now available on YouTube for your [viewing enjoyment](#).

## **AIR SHOWS AUGUST 30 AND SEPTEMBER 6-7**

CCSC will be represented at three air shows coming up: Red Stewart Airfield (Cubby's) in Waynesville on Saturday, August 30, Wright Brothers Aero Carnival on Saturday, September 6, at Huffman Prairie and Lunken Airport Airshow both Saturday and Sunday, September 6-7. [Bob Miller](#), [Brian Stoops](#) and [Gary Adams](#) are coordinating CCSC participation at the three fields, respectively. Brian is preparing new brochures. There will be a raffle at each airshow for a free glider ride which will provide us with contact information for prospective new members. If you would like to volunteer to help, contact one of the coordinators. Your help will be appreciated.

## **ASTRONOMY AT SEPTEMBER POT LUCK**

Mark your calendars. The pot luck dinner on September 20 will feature Dean Regas, astronomer at the Cincinnati Observatory, who will give a presentation about astronomy. He has a reputation as a very interesting speaker, so you will not want to miss this. There is a potential for it being a great evening for star gazing since there will be minimal moonlight, so bring your telescope.

## **HOW MANY CAN YOU NAME?**

Jim Price has been digging through some of his old photos and sent this one to challenge your memory. How many members of the 2nd Sunday Crew can you remember from this April 2001 photo? Even Jim is having difficulty identifying who is in the 1-26 and who is in the background by the tail. Does the Crew Chief remember? Send your list of names to [Jim Price](#). Possibly a prize will be awarded Sunday evening at the Hors D'oeuvres and Wine Sharing Party.

**How many faces do you recognize from this April 2001 photo of the 2<sup>nd</sup> Sunday Crew?**
