**FOURTH SATURDAY REPORT- CHUCK LOHRE**

The Fourth Saturday Crew made short work of assembling the Grob 103. With Bernie Fullenkamp and John Murray's help all the little details that make it easier were used. Bernie told us that he had assembled other Grob 103's five times this year. His other club has five of them, stationed at several Airports around Utah. John's work on the canopy looks better than new, he did a perfect job of rebuilding the rear canopy locking mechanism. It is as smooth as butter now!

Also, John applied new "No Lift" stickers to the canopy windows.

#### **FOURTH SUNDAY REPORT – STEVE STATKUS**

Dismal weather to start the day with clearing by noon. Gusty winds from the Southwest. We disassembled CC and laid it out in the workshop for annual.

Around 12:30 the ceiling lifted to 1600 AGL with a broken overcast. New member Kenny Kirk was determined to try his luck and Kat McManus agreed to protect the glider. They got in two flights before calling it quits.

Keith Kilpatrick repaired the plumbing in the men's room. We burnt some firewood and cooked some hot dogs and called it a day around 14:30.

#### **GOOD NEWS ABOUT DICK ECKELS**

Mark Miller reports that Dick was released from the rehab facility last weekend and is now at home. He is doing better and is regaining his strength.

## CCSC CROSS COUNTRY CAMP, AUGUST 3 -7, 2020 - CHUCK LOHRE

***Gliders finishing a race photo by astir698. The vapor you see is from the dumping of water ballast. Gliders load up with water before they launch and get rid of the extra weight before they land. A heavier glider will fly faster, increasing distance and speed points for the flight.***

Sailplane cross country flight with high performance gliders is an exciting and challenging way to fly. Plan now to take advantage of this rare opportunity for training and mentoring right at home at CCSC. Each day a different course will be chosen by the pilots and the [OLC scoring program](#) will choose the best 2.5 hour segment for scoring. Depending on the weather conditions maximum distance race around the course within a typical 2.5 hour period might be 150 miles. Participants will fly as far away as Columbus, north of Dayton and nearly to Indianapolis. The daily course stays at least 30 miles away from the Northern Kentucky, Greater Cincinnati airport.

At the camp, experienced pilots will take a small group of gliders out on course. Typical groups may include medium performance gliders like ASW 15, LS 4, Libelle, and LS 1 going to Clinton, Green County, Dayton Wright, Lebanon and back home. Another lower performance group might include 1-26, K6 or AC-4 Russia following the leader to Red Stewart airport three miles away and then on to Lebanon six miles more and then fly eight miles back to CCSC.

Are you ready? Read more about the [details on the CCSC website](#) and save the dates: Aug 3-7

### BRONZE BADGE QUESTIONS

Which aircraft has the right-of-way over all other air traffic?

- A. A balloon.
- B. An aircraft in distress.
- C. An aircraft on final approach to land.

When flying cross country at a minimum altitude of 2000 ft AGL you should

- A. select a specific landing area(s)
- B. be on the upwind leg of a specific landing area
- C. select a general landing area(s)

Which preflight action is specifically required of the pilot prior to each flight?

- A. Check the aircraft logbooks for appropriate entries.
- B. Become familiar with all available information concerning the flight.
- C. Review wake turbulence avoidance procedures.

What service can an FSS provide for a pilot wishing to fly into an MOA?

- A. provide clearance into the area.
- B. provide information on the use or non use of the area.
- C. provide traffic advisories in the MOA.

What do isogonic lines indicate on aeronautical charts?

- A. They are a line joining places of equal temperature.
- B. They are a line joining places of equal magnetic variation.
- C. They are a line joining places of equal pressure.

In addition to the standard briefing, what additional information should be asked of the weather briefer in order to evaluate soaring conditions?

- A. The atmospheric soundings to determine the thermal index at all soaring levels.
- B. Dry adiabatic rate of cooling to determine the height of cloud bases.
- C. Moist adiabatic rate of cooling to determine the height of cloud tops.

What is density altitude?

- A. The height above the standard datum plane.
- B. The pressure altitude corrected for nonstandard temperature.
- C. The altitude read directly from the altimeter.

The Soaring Society of America website provides a Bronze Badge Study Guide which is designed to help prospective Bronze Badge candidates prepare for the written exam. The [questions that are used for the Bronze Badge written test](#) are now presented in the form of a quiz. This will be very helpful for pilots preparing to take the written test for the Bronze Badge, so [take a look and try a practice test](#). An excellent list is provided with links to the fifteen references in which the full explanation of the subject matter is available.

## **HELP FINDING SOMEONE TO SWAP CREW DAY ASSIGNMENTS**

A web-based process for facilitating swapping crew day assignments was announced in the 2/21/2017 Frequent Flyer along with instructions for using the system. This process is intended to help members find another member who will agree to swap crew duties for one specific set of dates. It is not for getting reassigned to a different crew for an indefinite period. Mark Miller is now the person who oversees crew assignments, so Mark is the one to whom you need to speak about a long-term change.

Remember that UOP 2.2 CREW MEMBER DUTIES states: "All crew members are to report for duty at 9:30 AM and work until released by the Crew Chief. Each crew member is personally responsible for arranging for a qualified substitute in case of his or her absence. Scheduled crew members are expected to be present for each of their scheduled crew days regardless of flying conditions." This new process does not relieve any crew member from the responsibility for arranging for a qualified substitute and informing the crew chief; rather it is intended to help accomplish that task. As of 3:00 pm on 11/26/2019 there are no requests for a member to swap or substitute a crew day.

Jonny Stewart is now Skydive Sports! He is providing a drop off service right here at CCSC. If you need your parachute repacked, just leave it in the CCSC office and fill out one of the service cards and attach it to your rig.
